To Our Trusted Supplier:

Accurate Bushing is an ISO-9001:2015 and AS9100:D approved supplier and is required by the standard to audit our vendors on a “periodic basis”. Our quality system is uses a 2 year auditing schedule to limit the burden on our vendors.

Please take the time to read the ABC Supplier Code of Conduct outlining the expectations of the AS9100 community.

Also; Please fill out and sign the Supplier Business Survey form and the Non-Segregated Facilities form, as we cannot do business with vendors that are not on our Approved Suppliers listing and both these forms are required to be on file to maintain this status.

In addition, please send copies of any third party certifications (NADCAP, ISO, etc.) so we can make better use of any services you my offer and have proof on file for any customer audits that may take place over the coming year. I make this request to minimize any disruptions to your company’s routine when providing required certifications on an immediate basis ;( auditor’s request).

Please e-mail or fax the completed form to my attention at the address below.

If you have any further questions, regarding the Supplier Survey please contact our Quality Manager Paul Robuck, at 908-789-1121 extension 4244.

Additional PDF Copies of this form that can be completed on your computer are available at [www.smithbearing.com](http://www.smithbearing.com) quality for your convenience.

Your cooperation is greatly appreciated.  
Sincerely,

Paul Robuck
